

TED BERRY

Co. INC

Ted Berry Trenchless Technologies Team completes first ever pipebursting job in Belmont Massachusetts to replace an existing 6" Cast Iron municipal water main. The Town of Belmont owns and maintains a old water main that is directly under a road owned by the City of Cambridge (Home to Harvard University) and was looking for a trenchless method that would shorten the construction time and cause less disruption to the public. 2000' of new 8" pipe was installed in 4 days through 5 excavations measuring 5 feet wide x 15 feet long. "This is amazing technology, I cannot believe how quiet the whole operation is, thank you." A resident of Blanchard Road. "Your crews have done a fantastic job, thank you" Director of Public works / Town of Belmont, Ma.
